Specification

The disclosure is objected to because of the following informalities:

On page 4, line 20, the word "his" appears to be a typographical error for "is."

On page 6, line 27, a semicolon is used where a period should be used.

On page 8, lines 23-33, the specification refers to a "Figure 20" and a "Figure 19" even though such figures were not originally part of the specification. The Examiner suggests deleting all reference numbers and all figures numbers, in this paragraph, in order to overcome this objection.

Appropriate correction is required.

The amendment filed October 23, 2003 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material, which is not supported by the original disclosure, is as follows:

On page 9, line 3, the insertion direction of "in one direction" and "in the opposite direction" does not have clear original support because one cannot inherently tell that the "L" and "R" direction of the original specification were in opposite directions as now disclosed. The Examiner suggests replacing "the opposite" with "another" in order to overcome this objection.

Applicant is required to cancel the new matter in the reply to this Office Action.

Declaration

The declaration filed October 23, 2003 has overcome the previous objection to the declaration.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 1, paragraph (b), there is no clear original support for the step of “determining the diameter of the vessel” (see page 9, line 19-33 of the specification). Rather, only the length of the aneurysm is determined and the length of the stent-graft is determined from that information; there is no mention of determining the diameter of the vessel. Determining the diameter of the vessel may be implicit or inherent to this disclosure, but at least the step of determining the vessel diameter lacks antecedent basis from the specification. Claims 2 to 6 are also rejected because they depend upon claim 1, and thus, they contain new matter by inclusion of the language of claim 1.

In claim 1, section (c), the language “which maximum diameter is greater than the vessel diameter of step (b)” lacks original support and constitutes new matter with respect to the original disclosure.

In claim 1, section (d), the language of “the length that is greater than the length of the aneurysm when the stent-graft is dilated to its maximum diameter” lacks original

support in that there is no clear disclosure of this in the original specification. Even if it can be shown to be inherent based upon the figures, it still would lack clear antecedent basis from the written description.

Response to Arguments

The rejections of the previous Office action have been withdrawn, and thus, the arguments presented are considered moot.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be

applicable under 35 USC 102 of 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending claims is respectfully requested in response to this Office action.
